RESEARCH STUDY INFORMATION

Adult volunteers who have recovered from coronavirus disease 2019 (COVID-19) are needed to take part in a research study across California.

WHY IS THIS STUDY BEING DONE?

Individuals who have recovered from COVID-19 infection develop proteins called antibodies in the part of their blood called plasma. Antibodies are made by the immune system that fight infections and may help ward off future illness caused by the same infections. The purpose of this study is to conduct research to learn more about COVID-19 immunity by measuring antibodies in blood.

Researchers need the help of people who have recovered from COVID-19 to donate a small blood sample (about 3.5 tablespoons) to help learn more about the anti-COVID-19 properties of their antibodies.

You may be asked to provide two additional blood samples (up to approximately 2 tablespoons each) over time to answer additional questions about your COVID-19 immunity. The information we learn by doing this research study may help to develop a treatment for COVID-19.

WHAT WILL HAPPEN DURING THE STUDY?

- You will be asked to answer a screening questionnaire on a secure website to tell us more about your past COVID-19 illness.
- If you are found eligible, you will be contacted to schedule a visit at a participating site or at your home to donate a small blood sample.

- After analysis of your blood, you will know whether you have developed antibodies.

WHY SHOULD YOU PARTICIPATE?

By participating, you will help researchers understand how the COVID-19 infection and vaccines work to provide antibodies against future infections. With the emerging variants of COVID-19, this information may help researchers gain valuable information for future epidemic seasons.

WHO CAN PARTICIPATE?

To qualify, you must:

- Have recovered from a COVID-19 infection. Proof of past COVID-19 infection is required. But if you do not have the test results, you may still be accepted into this study, based on your online screening questionnaire.

- Be over 18 years old.

Vaccinated people are eligible for the study.

COMPENSATION

You will be compensated \$50 for each blood draw in the form of a gift card at the end of each blood donation.

YOU WANT TO LEARN MORE. WHAT'S NEXT?
